PROFILE

Computer Science and Engineering student with a strong interest in artificial intelligence, natural language processing, computer vision, and web development. Experienced in building AI-assisted applications, responsive interfaces, and practical software projects using Python, JavaScript, React.js, and related technologies. Interested in creating user-focused solutions that solve real-world problems.

EDUCATION

B.Tech in Computer Science & Engineering | Techno Institute of Engineering and Management, Habra, West Bengal

Expected Graduation: 2028 | 1st Year SGPA: 8.2 | 2nd Year SGPA: 7.2

Higher Secondary Education | Profullanagar Vidyamandir

Marks Secured: 68%

Secondary Education | St. Stephens School, Habra

Marks Secured: 88%

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL

Web Technologies: HTML5, CSS3, React.js, Responsive Design, DOM, REST APIs

AI & Machine Learning: NLP, Chatbot Development, Computer Vision, Gesture Recognition

Databases: SQL, Firebase

Developer Tools: Git, GitHub, VS Code, Google Colab

Core Concepts: Data Structures and Algorithms, OOP, DBMS, Software Engineering

Soft Skills: Problem-Solving, Teamwork, Communication

PROJECTS

Questora — AI-Powered Multilingual Voice Assistant

Tech Stack: Python, JavaScript, React.js, AI APIs, Speech Recognition

- Developed an AI-powered assistant inspired by Gemini and ChatGPT for answering user questions intelligently.
- Added voice-based interaction and multilingual answer support to improve accessibility and user experience.
- Designed the concept around natural conversational interaction, quick responses, and an easy-to-use interface.

Wonder Goal — Travel Planning & Budgeting App

Tech Stack: React.js, JavaScript, AI Integration, Web Technologies

- Designed a travel planning application that makes trip planning simple, affordable, and personalized.
- Combines itinerary planning with intelligent budget management to help users organize trips within their budget.
- Focused on practical travel recommendations, expense awareness, and a user-friendly planning experience.

MOCHI — AI Assignment Assistant

Tech Stack: Python, NLP, AI/ML

- Designed an AI-powered assistant that understands and responds to academic queries.
- Built an NLP logic pipeline in Python to streamline academic workflows.

Smart Health Project

Tech Stack: Python, React.js, HTML, CSS

- Built a health-monitoring web application to track and manage user health data.
- Developed a responsive React frontend integrated with Python backend logic.

Gesture Control Project

Tech Stack: Python, OpenCV, MediaPipe

- Engineered a gesture-recognition system for touchless software interaction.
- Implemented gesture-mapping algorithms that translate hand movements into system commands.

Conversational Chatbot

Tech Stack: Python, NLP, HTML, CSS

- Developed a context-aware conversational AI chatbot with a web interface.
- Applied NLP methods for dialogue management and interactive user experience.

CERTIFICATIONS & ACHIEVEMENTS

- Internal Hackathon Winner (2025) — Recognized for rapid prototyping and innovative problem-solving.
- Python for Everybody — Coursera / University of Michigan.
- Web Development Mastery: HTML, CSS & JavaScript.

LANGUAGES

English (Proficient) | Bengali (Native)
